

## Phishing Page Simulator using Zphisher

Output:

The screenshot displays a Google Cloud Shell terminal window and a web browser window. The terminal window shows the Zphisher 2.3.5 interface, which has successfully hosted a phishing page at `http://127.0.0.1:8080`. It is waiting for login information and has captured the following details:

- Victim IP Found !
- Victim's IP : 127.0.0.1
- Saved in : `auth/ip.txt`
- Login info Found !!
- Account : testuser
- Password : pass123
- Saved in : `auth/usernames.dat`
- Waiting for Next Login Info, Ctrl + C to exit.

The web browser window shows the simulated Spotify login page. It features the Spotify logo at the top, followed by three social login buttons: "CONTINUE WITH FACEBOOK", "CONTINUE WITH APPLE", and "CONTINUE WITH GOOGLE". Below these is an "OR" separator, followed by input fields for "Email address or username" and "Password". There is a "Forgot your password?" link, a "Remember me" checkbox, and a "LOG IN" button.
